

50 µm PP- hybrid Film with electrostatic charge

FOLIOCONTACT

white hybrid-film

Rawmaterial: **PP coex/Cast 3-layers**

Colour: **white**

Surfacetreatment: **none**

Ghaughe: **50µm**

Operating Temperature: **10° bis 45°C**

Opacity: **≤30%**

Printingprocess: **n. a.**

Sheetsize: **600 x 800mm**

Sheets per Roll **10**

Roll length: **8m**

SQM/ Roll: **4,8m²**

Single-shipping **min 1 Roll**

Packaging Units: **1, 2, 9, 18**

Shipping large amounts **Euro-Pallet**

Storage Duration: **min. 5 Years (dry)**

FOLIOCONTACT HYBRID

is an environmental friendly Flip-Chart Media, made of Polypropylen. It has been developed and been produced by NOPAR INTERNATIONAL GMBH.

FOLIOCONTACT is a special produced 3-layer coex cast PP-Film. The mid Layer is able to take on ionisation and keep it for at least 5 Years, depending on the storage conditions, packed and boxed at 40-50% rel. humidity, at 18°-22°C.

The 10 sheets in the size of 600mm width and 800mm length can easily be separated from the roll at the provided perforation line. Each sheet adhere to virtually any surface without any other tools, such as adhesive or pins disputes.

The film is ideally suited for use with non-permanent, or dry erase whiteboard markers. When using permanent markers, it will be not possible to clean the film surface again, except when alcoholic cleaning solution is taken (please care about dangerous Goods Regulations). FOLIOCONTACT is not made for printing or individual printed artworks in this case we recommend the product FOLIO CONTACT GRIDDED.

In addition to the standard version, FOLIO CONTACT can also be individual imprinted, for example with a company logo up to 8 colors. The minimum order for this is based on the complex printing technology at about 220 rolls.
